Manning the Crow's Nest – Using Relevant Metrics and KPI's to Drive Achievement of Agency Objectives

Location: Meeting Room A

Phil Feldman - National Director of Revenue Cycle Management, Sandata Technologies

Achieving agency success, or even just survival, is more complex than ever. The main goals - providing excellent client care, achieving growth, and optimizing financial results, are inescapably intertwined. However, it is inordinately inefficient to review and react to reams of data to determine which areas require attention to accomplish agency objectives. This presentation discusses how to identify relevant metrics and KPI's (Key Performance Indicators), based on agency objectives and environment, that can be used to impact behaviors needed to achieve those goals.

Crisis & Neurodiversity 101

Location: Meeting Room B

Cheyenne Ver Voort - Services Coordinator, Agape of Appleton

This presentation will examine the intersection of crisis intervention and neurodiversity by exploring unique considerations for neurodivergent clients in crisis, with a special focus on autism and related disorders. This presentation aims to improve crisis intervention services for neurodivergent people by increasing professional knowledge of neurodiversity, sharing resources, and providing education on best practices while centering the voices of people with lived experience. Attendees with a variety of professional experience will value the opportunity to engage with a fellow provider.

WEDNESDAY, NOVEMBER 6

Assistive Technology for People with Disabilities

Location: Meeting Room C

Mary Hill - Customer Success Engineer, Entrusted Technology Solutions

With evolving technology and artificial intelligence, understanding and exploring its features and benefits can positively impact those with disabilities. Artificial intelligence, wireless devices, innovative software and apps, and digital platforms are just a couple of examples of assistive technology that can help those with special needs in their daily life. We would like to share specific AI applications that are making a difference in this area. Attendees will experience examples of specific platforms and devices that are making an impact.

Basic Principles of Servant Leadership in the Disability Service Provider Industry

Location: Meeting Room E

Liz Filter - President/CEO, VARC

Megan Tully - Director of Strategy, VARC

Servant Leadership in disability services goes beyond management; it embodies a commitment to advocacy, inclusion, and the holistic well-being of individuals with disabilities. It sets the tone for a compassionate and purpose-driven organizational culture, ultimately contributing to the creation of a more inclusive and supportive society.

The Club Sandwich Generation: The Role of Siblings

Location: Room E

Harriet Redman - Founder/Director of Special Projects, WisconSibs

Adult siblings of people with disabilities have been called members of the 'Club Sandwich Generation' managing the needs of their aging parents, their growing children or business, PLUS their sibling with intellectual/developmental disabilities. Growing up, they experienced a mix of positive and negative situations, reactions, and feelings.

Professionals and other direct care workers can benefit from understanding sibling perspectives and the role of siblings in caregiving and future planning. While each sibling and each situation is unique, gaining insights from a sibling perspective will lead to more successful strategies and support for them as caregivers and their care recipients. This session will be interactive to maximize the experiences and expertise of participants.

Safer Med Passing, Happier Clients & Residents: Using AI to Reduce Med Errors

Location: Room F

Loren Odom - Provider Relations, ECP

Nicole Shelton - Compliance Expert, ECP

Using AI-powered tools makes medication administration WAY safer and easier. A typical resident can be on a dozen or more medications, each with a different dose, route, and schedule. Managing thousands of daily medications means even one mistake can be devastating. Join us for a discussion on how AI is changing the game in both eMAR innovation and resident safety, helping communities and their residents live healthier and happier lives. Their experience spans across a variety of service offerings including Youth Daily Living Skills, Day Services (facility and community-based), Employment (DVR and Long-term Support), CSL, AFH, and Behavioral support services. This session will walk listeners through the approaches of collaboration and learning that continues to shape the organization's transformation.
